

BeeLine Reader

Color is the new black

BeeLine Reader makes text easier to read by using eye-guiding color gradients. These gradients wrap from the end of one line to the beginning of the next, reducing the incidence of line transition errors. Readers of all ages and skill levels use BeeLine to make reading easier and more enjoyable. Many readers—especially those with dyslexia, attention deficits, or ELL challenges—find that BeeLine allows them to read with unprecedented fluency and ease. BeeLine's technology has been validated by independent research and adopted by the California Public Library System.

FOR READERS OF ALL AGES

“For the first time, my son is excited about reading. There are tears in my eyes emailing this to you because I am such a happy and thankful mother.”

- Parent (and K-8 Principal)

“I've been using the BeeLine chrome plugin and I love it.”

- Professor, Stanford University
